

Pneumatics Training Courses

Hands-on training
from experienced
engineers

► The Courses

Equip engineers with the skills required to maintain and upgrade equipment. The programme provides a basic introductory course and more advanced, specialist courses to extend knowledge and skills.

All of the courses include a significant practical element and can be adapted to suit specific industry or business requirements. Course fees are, on average, £200 per person per day.

Training venues: Cardiff, Plymouth or at your premises

Maximum of 8 people on each course

► The Programme

Basic Pneumatics (BP1) - A solid foundation in pneumatics

Electro Pneumatics (EP1) - Focus on electrical, electronics and advanced pneumatic devices

Troubleshooting and Maintenance of Electro/Pneumatic Systems (TM1)

Energy Saving (ES1) - Looking at the cost of providing compressed air

Vacuum Technology (V1) - An introduction to this method of automation

Courses are run throughout the year.
We can also arrange a bespoke course for your company.
